

# LEARNING MANAGEMENT SYSTEM

LMS

# E Learning System

Easy to learn

“

Welcome to the E-Learning system.  
Here students as well as educational  
institutes will be entertained, by  
provided a fully user friendly  
environment for learning as well as  
management and entrainment.

# Problem

In current situation of Epidemic environment, students as well as educational institutes, are facing many problems doe example:

- Study related problems
- Management related Problems
- Examination related Problems
- Contacting Teachers related problems for students
- Study Related Queries
- Commencing Lectures
- Scheduling Lectures
- Commencing Assignments

The problem can be solved by providing a user friendly platform. A platform, where students, teachers and institute management can work on their sides by staying at home. This platform can be named as Learning Management System(LMS) or E-Learning System.

# solutions

Write main solutions you are providing

## Management Level Access

All staff of management will have high level access on all of the systems.

## Attendance

Teachers can take students attendance online on the platform by just one simple click. However management , then can calculate student attendance percentage.

## Schedule Lectures

The management assigns lecture timings to the teachers and students can listen to their lectures.

## Teacher Level Access

Teachers or professor staff will have lower access to the system, than management staff.

## Examination

Teachers can carry out examination on the platform related to their subject by following simple steps. The management can then get marks of each student for their own calculation.

## Upload Lectures

Teachers can upload their recorded lectures on the system so that students can listen to them, anytime they want.

## Student Level access

Students will have the lowest access to the system than both previous access levels.

## Assignments

Teachers can give and receive assignments from students and then give marks accordingly. These marks can be used by management for calculation purposes.

## Communication

Students can communicate with each other in groups or individually for study related queries. Students can also communicate with the teacher or groups of students can communicate with teacher. Management can also contact students or teachers on the platform

# solutions

Write main solutions you are providing

## Reminder

Students or teachers can set a reminder for their scheduled lecture or assignment or upcoming Exam.

## Analytics

Teacher, management as well as students can view their (student's) presence or enrollment in the course.

## Add or Remove

Management can add or remove anything in on the system, for example students, a file , etc.

## Entertainment

Students can get entertainment on the platform by playing games or listening to the music.

## Fee System

Students can get their fee challans uploaded by the management in each semester.

## Login

All staff members, students and teachers will have their own individual logins.

## Logout

Each one of the individual can logout from the system without losing their data.

## Search

Every one of the individual can search anything on their account without facing any difficulty.

## User Friendly

The system is user friendly. Anyone, with the basic knowledge of computer can fully use the system without any difficulty.

# THANK YOU
